

LEED INFORMATION

WHAT IS LEED?

Leadership in Energy and Environmental Design is a certification program of the nationally accepted benchmark for the design, construction and operation of high performance green buildings. LEED serves as a tool for buildings of all types and sizes and works on a point based system where projects earn LEED points for satisfying specific green building criteria. There are now six LEED credit categories, which include Sustainable Sites, Water Efficiency, Energy & Atmosphere, **Materials & Resources (MR)**, Indoor Environmental Quality and Innovation in Design. Within these six categories there are credits you can qualify for, in turn earning LEED points for your project. You can find more information at www.usgbc.com.

BOMETALS AND YOUR LEED PROJECT

BoMetals, inc. serves the concrete and masonry construction market by manufacturing a wide variety of products used in commercial and residential construction that complies with the **Materials & Resources (MR)** section of LEED.

MR Credit 5 Regional Materials

Is your job site within a 500-mile radius (or "as the crow flies") from our manufacturing facility in Carrollton, GA, 30117? If so, please see this credit section on your project checklist/scorecard.

MR Credit 4 Recycled Products

The BoMetals products listed below are all made from 100% Pre-Consumer (same as Post-Industrial) recycled materials.
