

Zip Joint

Zip Joint is an easily installed joint former designed to provide positive control of transverse construction or expansion joints. The two-part assembly is designed to permit removal of the top portion after the concrete has hardened, thereby creating a clean, neatly defined void for application of caulk or sealant when specified.

Cat. #	A	B	Feet Per Box	# Box
1010	1"	1"	500'	29
1011	1"	1 1/2"	500'	38
1012	1"	2"	500'	47

Expansion Board Cap

Expansion Board Cap provides clean, sharp lines for sealant. It eliminates the difficulty of removing wooden formers.

Cat. #	A Board Size	B Void Depth	C Void Width	Feet Per Box	# Box
1018	3/8"	3/8"	5/16"	500'	18
1019	1/2"	3/8"	5/16"	500'	26
1020	1/2"	1/2"	7/16"	500'	27
1021	3/4"	1/2"	5/8"	500'	36
1022	1"	1/2"	7/8"	500'	41
